MORE THAN 16,100 STUDENTS VISIT MEET-U IN 2010

MEET-U was invited to participate in many student oriented functions like the 2010 Boy Scouts of America Campagna at Moraine State Park, September 25 (pictures above), Montrose Vehicular Career Day and the National Chemical Week at the Carnegie Science Center (pictures below).

THANK YOU MEET-U

Meet U Trailer

The Mobile Energy Educational Trailer (MEET U TRAILER) was made available to the public on May 5th, 2010. Several bus loads of students were able to take advantage of the MEET U TRAILER as well as the residents from Gracious Living Estates and the general public. **It was a big hit!** WNEP- TV interviewed them... this was all due to the generosity of Drake Well Museum. (MEET U Trailer) Approximately 100 people attended for the day.

Vehicular Career Day 2010

✦ The 2010 Vehicular Career Day held at Montrose Area High School on May 6th, 2010 was a highly rewarding experience for over 530+ Fifth Graders. What an awesome day! The schools that attended were: Elk Lake, Montrose, Susquehanna Community, Mountain View, Blue Ridge and Forest City. **537 students, 6 schools, 22 organizations and 47 presenters.**

THANK YOU!!!

Sincerely, Marleen Butler

Mike Forgione & the entire staff of the Meet U trailer,

I would like to inform you of our appreciation of your visit to our school in June. We conduct an elementary science Olympiad annually for the 4th, 5th & 6th grade which involves scheduling outside presenters. The program that you and your staff conducted was far and above what we expected. The students and teaching staff appreciated the information that was given about the drilling process, especially due to the fact it is happening in their backyards. Many of the students were impressed by the education on the importance and impact of this fossil fuel in their day to day lives. The “wow factor” that puts this presentation at the top was that the students got to leave their classroom and walk through the trailer. This event makes an even greater impression on the students and helps to maintain that knowledge longer.

Thank you again and we would welcome you back at any time.

Evy Breitigan

Biology teacher Avella High School

NEVER FINISHED AND ALWAYS IMPROVING

The MEET-U exhibit made some obvious changes to start the 2010 season the most notable was the graphics wrap on the truck. The internal exhibits went from papers taped on the wall in 2009 to 14 televisions and three dimensional objects. Even then the inside has changed no less than five times throughout the season. MEET-U finished up the year with fifteen televisions, one push button station and a touch-screen computer.

Changes for the 2011 season are already under way, with the removal of a TV and the insertion of a second touch-screen. The trailer will be divided into three zones the using zone, finding/production zone, and last will be the energy zone. In this zone we will ask visitors to choose energy source for the future and present the pros and cons to their choice.

FORUMS, FUNCTIONS, FAIRS AND FESTIVALS! OH MY!

MEET-U participated in three forums, three industry functions, four fairs and five festivals. By participating in these events it allowed MEET-U to be exposed to large numbers of public; really large numbers say to the tune of over 30,000 adult visitors.

April 18, PSATS in Hershey

Oct. 1, Coudersport Falling Leaves Festival

PIOGA President and Executive Director Lou D`Amico presenting the \$10,000 check to MEET-U members Harry Wilmoth and Dan Weaver.

Since January 1, this year the Mobile Energy Education Training Unit has raised \$90,579.62. We are currently working on securing more funding through company and educational granting opportunities.

THANK YOU MEET-U

Hey Dave,

Just wanted to reply about the MEET-U trailer. I thought it is well put together and has a lot of the introductory info about energy resources that are available. I also thought you all did a nice job talking about the alternative energy possibilities for the future. I would expand that part of the display and make sure all the posters and info are up to date. I think you also make a good point with your display that Natural Gas is really the bridge energy to those future possibilities. The information that was presented outside the trailer in regards to future careers also was well done. I appreciated that you spoke honestly about the hours involved and the need for a good work ethic as well.

All-in-all, it was well presented and very beneficial to my 9th grade science students.

Thanks again for coming out to MHS,
Matt Crocker
Maplewood Science Dept.

October 13, 2010

Dear MEET-U Team,

Hello! We are the fourth grade class from Cathedral School, Harrisburg, PA. Thank you for taking the time to teach us about oil, natural gas, and other sources that our energy comes from. Also, thank you for the rock and oil to keep in our classroom. The glow sticks were great too! We had fun being there and thanks again for the great day.

Sincerely,
The Fourth Grade

Dave,

The opportunity that students had to go through the truck was incredible. It gave students to see other career paths, and ways to better utilize our resources. I learned new things each time I went through.

Dan Fenner
Maplewood
